

How to setup IMAP email on Android smartphones

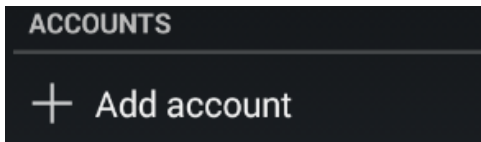

Document by Dylan

Date: 8/2/2018

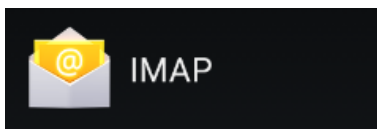

1. Go to setting

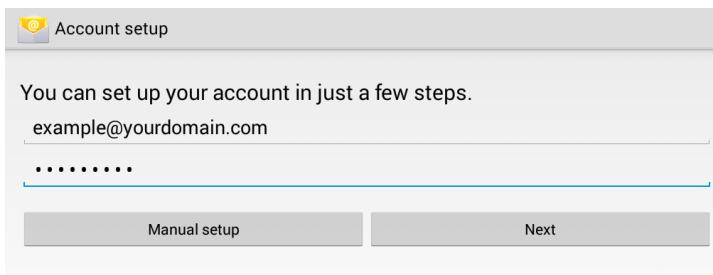

2. Click setting, scroll down until you saw **Accounts**, click on **Add Account**

3. Select IMAP to continue

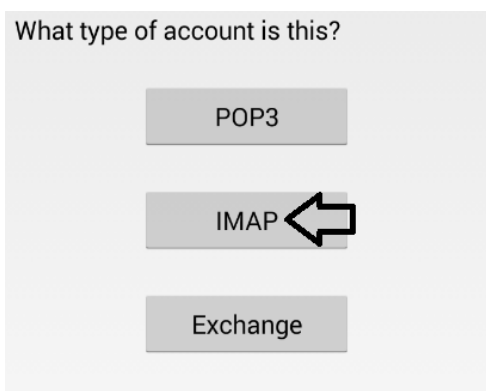

4. Enter all the details in the required field to proceed, Click Next

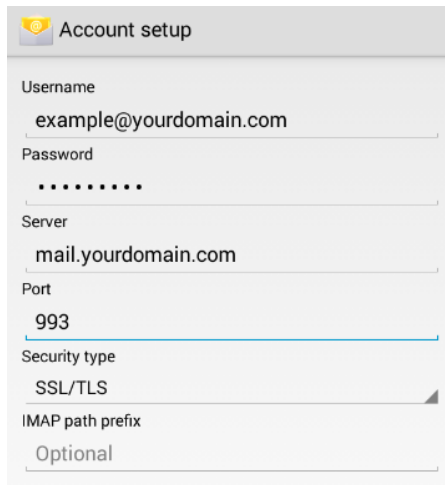

Email: example@yourdomain.com

Password: Your email password

5. Select IMAP again to modify the Email server setting

6. Enter all the details in the fields for Incoming Mail server

The screenshot shows a form titled "Account setup" with the following fields and values:

- Username: example@yourdomain.com
- Password: (masked with dots)
- Server: mail.yourdomain.com
- Port: 993
- Security type: SSL/TLS
